PROFILE SUMMARY

An adaptable and fast-learning cybersecurity enthusiast, holding a Bachelor's in Computer Applications and a Master's in Cybersecurity Degree. eJPT Certified Offensive Security Specialist. Expert in Red Team Ops, Active Directory, Ethical Hacking. Skilled in Network Assessments, Buffer Overflows, OSINT using Metasploit, Mimikatz. Developed ML/Python security tools to harden environments via advanced threat mitigation.

INTERNSHIPS & PROJECTS

National Forensic Sciences University | Drone Forensics, Aeromodelling & Aerodynamics 2026

- Developed a complete drone forensics solution with a custom hardware acquisition tool and software for forensic extraction, analysis, and reporting, while separately designed and built a fully functional, ready-to-fly drone.
- Contributed to live-case investigations involving drone forensics, supporting evidence collection, analysis, documentation, and investigation activities.

Defence Research and Development Organization | Blockchain Threat Detection 2026

- Developed a blockchain threat-detection and forensic investigation application for Bitcoin, DeFi, and smart contracts that traces gas and transaction flows, identifies attackers, victims, and relevant nodes, and securely stores forensic data on a local server for fraud investigation and analysis.

Quantum Safe Evidence Locker | Quantum Forensics, Blockchain Technology & Cryptography 2026

- Developed a secure application to detect and track fraudulent trading, mutual fund, SIP, Telegram, and bot activities, trace fund transactions, support fraud investigations and recovery, and protect data through quantum-resistant encryption for secure cloud or local storage.

Honeypot: Rogue Snare | Python, Flask, NoSQL & IP Logger 2025

- Developed a honeypot website to detect and analyze emerging attacks, capture attacker details and network indicators, and maintain records to support the identification and investigation of potential zero-day attacks.

Space Applications Centre, Indian Space Research Organisation | Network Security 2026

- Developed a network security management website, implementing DNS-layer security, web filtering, threat detection, access control, policy management, activity monitoring, and centralized administrative control over network traffic.

State Cyber Cell CID Crime, Gujarat Police | Malware Analysis & Digital Forensics 2025

- Developed a cross-platform malware analysis application for Windows, Linux, macOS, and Android that scans downloaded files and connected USB devices for malicious activity before access, provides safe/danger alerts, analyzes various file types including ZIPs, PDFs, and folders, and displays detailed file metadata for security assessment.
- Developed a website security platform that detects phishing links, cloned websites, and malicious honeypots to protect users from information theft, while analyzing website ownership and associated details to support investigations.
- Contributed to live cybercrime investigations through digital evidence collection, forensic analysis, case documentation, and investigative support.

CERTIFICATIONS

- Certified Red Team Professional by Altered Security
- Certified Ethical Hacker (CEH) by EC Council
- eLearnSecurity Junior Penetration Tester by INE
- Cisco Certified Network Associate (CCNA)

TECHNICAL SKILLS

- OSINT (Open Source Intelligence)
- Post-Exploitation Tactics
- Overflows)
- Active Directory Security
- PowerShell Empire & Mimikatz
- Cloud & Blockchain Security
- Network Security Assessment
- Binary Exploitation (Buffer
- Malware Analysis

EDUCATION

Ganpat University 2024-2026
Masters in IT Cyber Security, CGPA-8.5 Kherva, Gujarat

Institute of Engineering & Management 2020-2024
Bachelors of Computer Applications, CGPA-8.8 Kolkata, West Bengal

St Joseph's Convent, Chandannagar 2006-2020
Standard X, CGPA-8.5 Chandannagar, West Bengal
